

ANDROID APP FOR V2V COMMUNICATION USER DOCUMENT

WINDOWS:

SOURCE CODE:

- Download and install Git Bash
- Open Command prompt.

PUTTY

Download and install latest version of Putty

ANDROID STUDIO:

Download and install Android studio from https://developer.android.com/studio

• Open/import "My Application" project.

UBUNTU:

Download and install Android Studio.

- Open the folder and extract the files.
- Open bin folder and open in terminal.
- Terminal command: ./studio.sh.
- Open/import the cloned project.

Open minicom through terminal.

TO CHANGE THE MAC ADDRESS AND UUIDS:

Open MainActivity.kt file:

MyApplication>app>src>main>java>com>example>myapplication>MainActivity

```
private val POLLING INTERVAL = 10 //Reading time interval

val targetMacAddress = "00:1E:C0:3E:1B:3C" //For scanning using macAddress

private val SUUID = "6e400001-b5a3-f393-e0a9-e50e24dccA9e" // Replace with the OBU service UUID

private val CUUID = "6e400002-b5a3-f393-e0a9-e50e24dccA9e" // Replace with the OBU characteristic UUID
```

- ➤ To alter the time interval(millisecond) in which the data is read from the OBU, Change the value assigned to polling interval variable.
- ➤ **To connect it to some other OBU,**Change the MAC address, service UUID and characteristic UUID

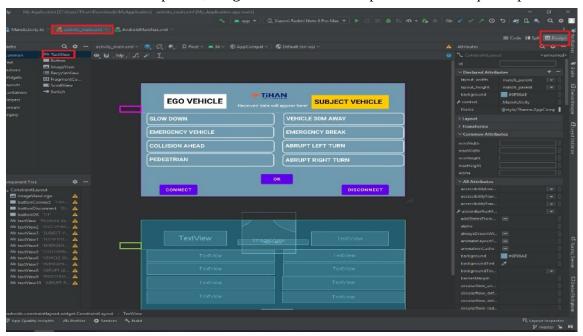

TO ADD TEXTVIEW:

Open activity_main.xml:

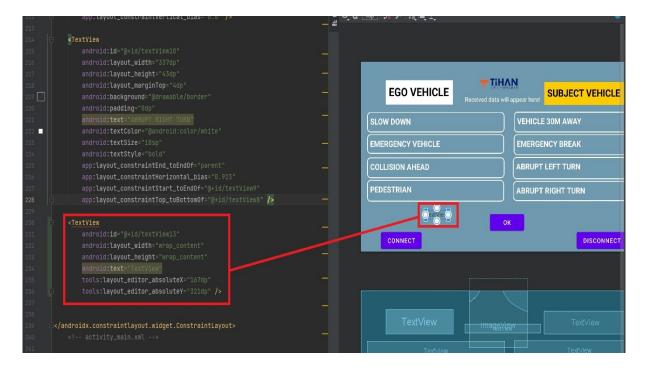

MyApplication>app>src>main>res>layout>activity_main

Click on the top right corner to open Design.

Click on TextView from the palette, drag it to the screen and place it in the required position.

The textview with its ID will be automatically added to the activity_main.xml code.

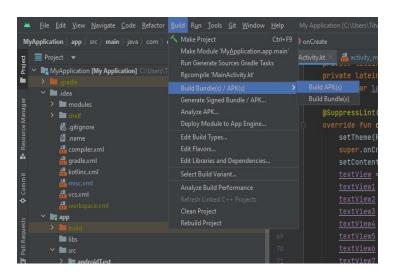

To apply it in the MainActivity.kt

```
ers\Tihan\Downloads\MyApplication] - MainActivity.kt [My_Appli
private val <u>SUUID</u> = "6e400001-b5a3-f393-e0a9-e50e24dccA9e" // Replace with the OBU service private val <u>CUUID</u> = "6e400002-b5a3-f393-e0a9-e50e24dccA9e" // Replace with the OBU charact
//initialise UI
private lateinit var <u>bluetoothAdapter</u>: BluetoothAdapter
private lateinit var <u>bluetoothGatt</u>: BluetoothGatt
private lateinit var bluetoothGatt: Bluet private lateinit var textView: TextView private lateinit var textView2: TextView private lateinit var textView3: TextView private lateinit var textView4: TextView private lateinit var textView5: TextView private lateinit var textView6: TextView private lateinit var textView6: TextView private lateinit var textView8: TextView private lateinit var textView8: TextView private lateinit var textView8: TextView
 private lateinit var <u>textView9</u>: TextView
private lateinit var <u>textView10</u>: TextView
private lateinit var <u>buttonConnect</u>: Button
private lateinit var <u>buttonDisconnect</u>: Button
          setTheme(R.style.<u>Theme_AppCompat</u>)
super.onCreate(savedInstanceState)
           textView = findViewById(R.id.textView)
textView1 = findViewById(R.id.textView1)
textView2 = findViewById(R.id.textView2)
          textviews = findviewById(R.id.textviews)
          textView10 = findViewById(R.id.textView10)
             val buttonOK: Button = findViewById(R.id.<u>buttonOK</u>) eg:textvie
                3 -> findViewById<TextView>(R.id.textView5)
5 -> findViewById<TextView>(R.id.textView6)
6 -> findViewById<TextView>(R.id.textView7)
               7 -> findViewById<TextView>(R.id.textView8)
4 -> findViewById<TextView>(R.id.textView9)
               8 -> findViewById<TextView>(R.id.<u>textView10</u>)
```

TO BUILD AN APK FILE:

Click on Build in the navigation bar. Build>Build Bundle(s)/APK(s)>Build APK(s) Locate it and copy the file to install it in our devices.

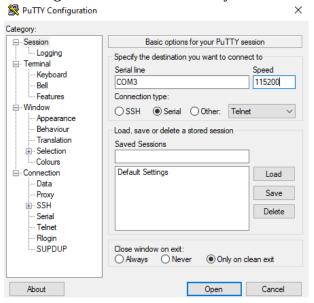

To run the app instantly on the device,

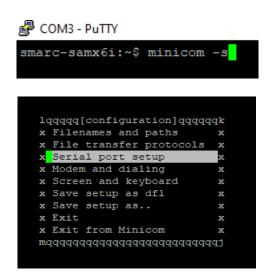

- Enable developer options(settings>about phone>versions/build number-tap multiple times) in your mobile phone and turn on USB debugging and Install via USB options.
- Connect the mobile phone and the PC using USB cable.
- Android studio will automatically find the device. Click on Run.
- Install the app in your mobile.
- Check logcat in the Android studio for updates.

To set up the connection between the OBU in DSRC,

Setup the putty configuration as given below and also verify the Port.

Commands for DSRC OBU:

- ☐ + Echo on/off
- \triangleright a advertise
- ➤ y stop advertising
- ➤ k end connection
- ➤ When it is connected, it displays,
- ➤ Write data shw,001c,31

COM3 - PuTTY

```
Welcome to minicom 2.7

OPTIONS: I18n
Compiled on May 12 2022, 04:29:45.
